

Parts Availability

Just because our cars are at least 20 years old it doesn't mean that you can't obtain parts from your local Rover dealer. I am constantly amazed by how many parts I can still obtain through the Rover dealer network. This is partly because other contemporary vehicles used the same parts (such as the Mini and Morris 1000), but there are still parts listed which are only relevant to the Sprite. For example last year they could still supply the front exhaust section for my exhaust, and they always have rear axle seals and bearing kits in stock. Bearing this fact in mind can often save long journeys to the specialists who rarely offer any price saving. Go to the links page for a list of suppliers.
